

Amendments to the Claims

1. (Currently amended) An aseptic combination preparation to be mixed at the time of use, comprising a plurality of ingredients which are contained in two or more separate chambers of at least one container, wherein the plurality of ingredients includes at least one medicinal ~~the same medicinal ingredients are~~ ingredient which is divided and accommodated in the two or more separate chambers.

2. (Original) The aseptic combination preparation according to claim 1, wherein a plurality of chambers are arranged in one container, or arranged separately in two or more containers.

3. (Previously presented) The aseptic combination preparation according to claim 1, wherein ~~an osmotic pressure ratio of each solution of~~ the at least one medicinal ingredients ingredient which is divided and accommodated in a plurality of chambers is adjusted has an osmotic pressure ratio in the range of 0.5 to 8.

4. (Original) The aseptic combination preparation according to claim 3, wherein a bicarbonate salt and a sugar are divided and accommodated in a plurality of different chambers, respectively.

5. (Currently amended) The aseptic combination preparation according to claim 3, wherein the ~~same~~ at least one medicinal ingredients ingredient which is divided and accommodated in a plurality of chambers is/are ~~are~~ a sodium salt or/and a sugar.

6. (Currently amended) The aseptic combination preparation according to claim 1, wherein ~~potassium ion concentration in each medicinal ingredients-containing solution~~ solution of the at least one medicinal ingredient which is divided and accommodated in a plurality of chambers ~~is adjusted to~~ has a potassium ion concentration not higher than 40 mEq/L.

7. **(Currently amended)** The aseptic combination preparation according to claim 6, wherein the ~~same~~ at least one medicinal ingredients ingredient which is divided and accommodated in a plurality of chambers ~~are~~ is a potassium salt.

8. **(Currently amended)** The aseptic combination preparation according to claim 1, wherein the container is a plastic container ~~in which the partition wall of~~ having a plurality of chambers which are separated by a partition wall which can be opened ~~can be communicated~~ at the time of use, and thus the at least one medicinal ingredients ingredient in the chambers can be aseptically mixed.

9. **(Currently amended)** The aseptic combination preparation according to claim 2, wherein ~~an osmotic pressure ratio of~~ each solution of the at least one medicinal ingredients ingredient which is divided and accommodated in a plurality of chambers is ~~adjusted~~ has an osmotic pressure ratio in the range of 0.5 to 8.

10. **(Currently amended)** The aseptic combination preparation according to claim 2, wherein ~~potassium ion concentration in each medicinal ingredients-containing solution~~ solution of the at least one medicinal ingredient which is divided and accommodated in a plurality of chambers ~~is adjusted to~~ has a potassium ion concentration not higher than 40 mEq/L.

11. **(Currently amended)** The aseptic combination preparation according to claim 2, wherein the container is a plastic container ~~in which the partition wall of~~ having a plurality of chambers which are separated by a partition wall which can be opened ~~can be communicated~~ at the time of use, and thus the at least one medicinal ingredients ingredient in the chambers can be aseptically mixed.

12. **(Currently amended)** The aseptic combination preparation according to claim 3, wherein the container is a plastic container ~~in which the partition wall of~~ having a plurality of chambers which are separated by a partition wall which can be opened ~~can be~~

~~communicated~~ at the time of use, and thus the at least one medicinal ingredients
ingredient in the chambers can be aseptically mixed.

13. (Currently amended) The aseptic combination preparation according to claim 4,
wherein the container is a plastic container ~~in which the partition wall of~~ having a
plurality of chambers which are separated by a partition wall which can be opened ~~can be~~
~~communicated~~ at the time of use, and thus the at least one medicinal ingredients
ingredient in the chambers can be aseptically mixed.

14. (Currently amended) The aseptic combination preparation according to claim 5,
wherein the container is a plastic container ~~in which the partition wall of~~ having a
plurality of chambers which are separated by a partition wall which can be opened ~~can be~~
~~communicated~~ at the time of use, and thus the at least one medicinal ingredients
ingredient in the chambers can be aseptically mixed.

15. (Previously presented) The aseptic combination preparation according to claim 6,
wherein the container is a plastic container ~~in which the partition wall of~~ having a
plurality of chambers which are separated by a partition wall which can be opened ~~can be~~
~~communicated~~ at the time of use, and thus the at least one medicinal ingredients
ingredient in the chambers can be aseptically mixed.
